NEC DisplayNote Software

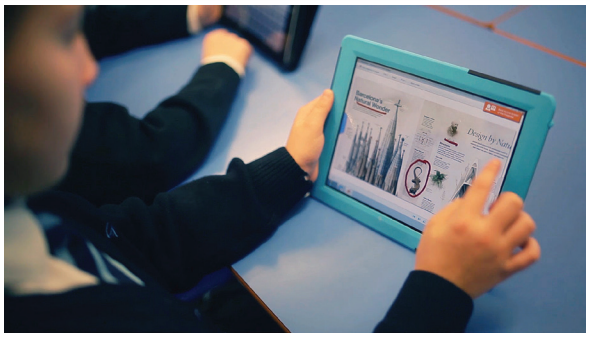
Present, share and collaborate across any device and platform

Highlights

- Begin a DisplayNote session and open any type of content, (PowerPoint, webpage, image, PDF, video, etc.)
- Users can annotate, underline, highlight and add notes to a presentation
- Send private messages to participants, build work groups, make any participant a presenter and view a participant's screen
- Audience members can connect to a presenter's session, capture the displayed content and save it for future reference
- Collaboration Mode allows groups of devices to work together to share presentations, annotations and images
- Users can save, store and send presentation content, allowing participants access to the presenter's content, their own notes and colleagues' notes

Tablets vs. Whiteboards

- Annotate in real time over your computer's desktop using image on the iPad - no more guessing as experienced with traditional tablets/slates
- Teachers can always be facing students while teaching
- Can be passed around the class, increasing interactivity with students
- Lightweight and transportable
- Works with an existing projector and screen – no need for new equipment
- Works with any educational software
- Built-in projector control eliminates the need for costly external hardware



Capture, Annotate and Collaborate

- Capture all of the presenter's notes, slides, images and video on your device
- Highlight, underline, add shapes, mark for review and send annotations to other connected devices
- Work together in groups of any size and on any device
- Share presentations, images, notes and annotations with the presenter and other connected devices

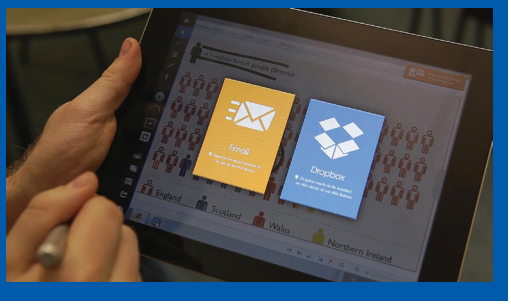
Control and Note Taking

Use your device to:

- present from anywhere in the room
- access your desktop
- create collaborative groups
- pass control to other devices
- view anyone's screen
- capture the presenter's content
- add your own written notes, post-its and references

View Screen and Save, Store and Send

- As presenter, you can view anyone's screen at any time
- Save, store and send presentations, images, annotations and all your notes to review anywhere, anytime and any place



DisplayNote for Education and Enterprise Customers

- Compatible across all platforms (Windows, Mac and Linux)
- Compatible with any device (iTunes App Store, Google Play for Android tablets, laptops and smartphones)
